find beauty in aging

Skin aging

Our lifestyle choices and the environment all increase the v of epigenetic markers, making them the main catalysers of skin aging.

Activators of epigenetic markers

age element®

Solutions based on epigenetic science which is able to reverse the markers in genetic expression to counteract the signs of aging in the skin.

mesoestetic®

.com

Aging is strongly determined by living conditions, responsible for activating specific molecular markers that lead to wrinkles, loss of firmness and brightness.

After years of research, mesoestetic® has developed a solution based on epigenetic science that manages to reverse the effects of these markers on gene expression to counteract the signs of aging in the skin. Innovation backed by an exclusive patent*.

Formulas and textures to enhance beauty at every stage. For the most demanding skin care experts.

**Study carried out in collaboration with the Josep Carreras research institute, renowned for its scientific advances in the field of epigenetics.*
