Skin sensitivity:

Sensitive skin is characterised by a disproportionate reaction to external stimuli. This type of response is a result of a series of issues:

Weakness in the skin defence system

A deficit of lipids or skin microbiota imbalances leave the skin exposed to external aggressions and can involve a proliferation of unwanted responses.⁽¹⁻³⁾

Increased sensitivity

Research shows us that this type of skin⁽⁴⁾ has hypersensitive nerve endings inclined to have an exaggerated response to external stimuli.

Vascular hyperreactivity

A high sensitivity in vascular response causes continuous vasodilation and vasoconstriction that involves fragility and risk of rupture of capillaries.⁽⁵⁾

Signs and symptoms

Sensitivity is identified by the following visible and invisible characteristics, that can appear permanently or transiently⁽⁶⁾:

According to their origin and characteristics, we can distinguish:

Sensitive skin⁽⁶⁾

We distinguish different degrees of sensitivity:

Sensitised skin

Healthy skin can also suffer occasional or permanent signs of sensitivity. Some external agents along with internal changes may be behind these signs⁽⁶⁾:

Sensitive skin solutions:

mesoestetic® has a range of solutions specifically designed to treat both permanent and transient skin sensitivity, returning balance and maximising skin tolerance.

The innovative formulas target the return of skin health and comfort by combining actions with active ingredients:

COMMON BENEFITS OF THE RANGE

MICROBIOTA BALANCE

The prebiotic, **acetyl heptapeptide-4**, restores the balance of the skin microbiota preserving the barrier function and the defence against pathogenic micro-organisms.

ANTI-OXIDANT ACTION

Acetyl tetrapeptide-2 has a protective action against oxidation caused by free radicals and reactive oxygen species from daily exposure to external aggressions.

Soothing and anti-redness action

Formulated using ingredients with recognised efficacy at reducing the signs the sensitivity to return the skin to optimum health and condition.

Repairing action

Relipidising, regenerating and repairing ingredients, that help strengthen the integrity of the weakened epidermal barrier.

Tested tolerance

Formulas with a high tolerance and safety supported by tests performed by dermatologists.

new: new-development product. **evo:** evolved product with redesigned formula, packaging and/or image for a better efficacy and consumer experience.

Sensitive skin solutions:

skin balance

Sensitive/sensitised skin

Intensive soothing concentrate that reduces reactive skin signs such as reddening, itching, burning and irritation.

INTENSIVE SOOTHING, ANTI-INFLAMMATORY ACTION

The combination and synergism of plant-based active ingredients work together to combat the causes of inflammation, immediately soothing and reducing redness.

REGENERATING ACTION

Panthenol⁽⁷⁾, together with **Aloe vera** and **marigold**⁽⁸⁻⁹⁾ extracts, stimulates the cell renewal processes to strengthen damaged skin.

BIOBALANCING + ANTI-OXIDANT ACTION

Apply 3-4 drops over the previously cleansed and dry skin, massage to complete absorption. Apply as the first step prior to the regular treatment cream.

30 ml dropper

couperend cream

Sensitive skin prone to couperose

Moisturising cream that reduces capillary fragility and redness.

VASOPROTECTOR, ANTI-REDNESS

The combination of **Ruscus**, **sweet clover**, **bilberry**, **hesperidin** and **aescin**,⁽¹¹⁻¹⁴⁾ together with chalcone are a powerful combination acting on inflammation to reduce visible redness and reinforce the capillaries.

MOISTURISING AND RELIPIDATING

High concentrations of **squalene** and **panthenol**⁽⁷⁾ gives nourishment and elasticity preventing flaking and irritation.

BIOBALANCING + ANTI-OXIDANT ACTION

Apply over the previously cleansed and dry skin, massage to complete absorption. Apply after skin balance or another concentrate regularly used.

50 ml tube

Efficacy and satisfaction results

A study performed under dermatological control demonstrated a high skin tolerance and efficacy of **skin balance**.⁽¹⁰⁾

21 patients with sensitive skin

28 days

2/day

Of 100% of the patients:

Reduction of erythema or reddening

Immediate relief

Reduction of burning, itching and irritation

More hydrated, softer and smoother skin

fast skin repair

Sensitive/sensitised skin

Soothing, regenerating cream that restores skin balance.

REGENERATING, RELIPIDATING, MOISTURISING ACTION

Panthenol, **allantoin** and **Centella asiatica**⁽¹⁵⁾ with a high repairing action stimulate tissue regeneration mechanisms.

Squalane, together with **hyaluronic acid** and **urea**, returns balance to the hydrolipidic film, strengthening the skin barrier.

SOOTHING ACTION

Daucus carota sativa root acts returning the welfare and comfort by reducing the signs of sensitivity.

BIOBALANCING + ANTI-OXIDANT ACTION

Apply over the previously cleansed and dry skin, and massage to complete absorption. Apply after skin balance or another concentrate regularly used.

50 ml tube

Hypoallergenicity

Dermatologically tested

Sensitive skin solutions:

balm

evo

melan recovery

Sensitive/sensitised skin at risk of hyperpigmentation

Balm with soothing, repairing effect.

SOOTHING, ANTI-REDDENING, REPAIRING ACTION

Rhodosorus marinus⁽¹⁶⁾ extract reduces skin sensitivity, redness and irritation. With **alpha-bisabolol** to provide a soothing, smoothing action. **Shea butter, squalane and ectoine** restore the weakened skin barrier.

PIGMENT CONTROL

Ectoine reduces the oxidative stress caused by blue light, allowing to control pigmentation.

BIO-BALANCING ACTION

Apply over the previously cleansed and dry skin, and massage to complete absorption. Apply on demand or follow the application guidelines recommended by the professional.

50 ml tube

rich cream

evo

anti-stress mask

Sensitive/sensitised skin

Intensive mask that soothes and relieves skin with redness.

SOOTHING, ANTI-INFLAMMATORY, ANTI-REDNESS

Rhodosorus marinus⁽¹⁶⁾ and **saffron flower** act on the signs of inflammation, skin sensitivity and redness.

Aloe Vera, chamomile and marigold are regenerating, soothing and smoothing.

BIOBALANCING + ANTI-POLLUTION ACTION

Apply a large layer of product over the previously cleansed, dry skin and leave on for 10-15 minutes. Remove the remaining product with a sponge or wet wipe.

100 ml tube

Sensitive skin professional solutions:

new image

crystal fiber mask

Sensitised skin/post-procedure

3D fiber facial mask. It enhances the cell renewal process, restructures the hydrolipidic film and moisturises the skin in depth.

INTENSIVE SOOTHING, MOISTURISING

The fresh texture and action of **seaweed extract** provides an instantaneous soothing, repulping effect. **Hyaluronic acid, urea** and **glycerine** moisturise and repair at different levels under the occlusive effect of the mask.

Remove one of the protective layers and adjust over the face. Once adjusted, remove the external protective layer. Leave on for about 20 minutes. After removing the mask perform a gentle massage to complete product absorption.

5 masks per pack

anti-stress mask

Sensitised skin/post-procedure

Soothing, repairing mask. Indicated after professional treatments that can cause transient erythema.

500 ml jar

evo

fast skin repair

Sensitised skin/post-procedure

Regenerating, ending cream. Enhances tissue re-epithelialisation after performing professional treatments.

500 ml bottle

SENSITIVE SKIN SOLUTIONS

A range developed to soothe and restore the most fragile and sensitive skin.

Formulas with a high tolerance and safety, supported by dermatological studies.

Reinforces the essential defence systems of the skin microbiota and barrier function, to reinforce it against external aggressions.

A range that reduces the signs of sensitivity and re-establishes skin comfort with maximum skin safety.
